

## Quaestor PRESENTATION

In the Roman Empire Quaestors were elected officials who supervised the treasury and the financial accounts of the state, its armies, and its officers. The Quaestors were tasked with financial supervision.

We now propose to provide these services for you, though we will not touch your money or your accounts. Your financial decisions are yours alone.

# Disclaimer

---

Before speaking with potential affiliates, the law states that we must make the following disclaimer:

It is illegal for a promoter or any participant in a trading business to persuade anyone to:

- 1 Make a payment by promising benefits from recruiting
- 2 To make any claims describing “high incomes are easily achieved”.

**Quaestor Solutions**  
owns the following brands:

- 1 Quaestor Master Node "ClickIt"
- 2 Quaestor Bot
- 3 Quaestor Coin
- 4 Quaestor Exchange

# What is a Masternode?

## MASTERNODE DEFINITION:

Master nodes are computer servers, setup to serve the users of a specific cryptocurrency.

To put it simply, a masternode helps to maintain the network, and a masternode is PAID to do this. All masternodes are rewarded with coins that are mined or minted.

Hosting a Dash masternode generates Dash coins, a Polis masternode generates Polis coins, and a Quaestor masternode, of course, generates Quaestor coins.

Earnings vary primarily according to the number of masternodes and each coin might have different pay-out periods, holding a masternode actually pays you coins every day or week.

As an added bonus, you STILL own and control the coins that YOU put in the masternode. We strongly believe this will be the BIG crypto opportunity of 2019 and 2020

Look at it this way: It is like getting paid passively on the money you have in your physical/old-fashioned wallet.

It is complicated to set up a masternode. For untrained people without Linux experience, it is virtually impossible. This is why we created the automated system to help you set up masternodes

## Quaestor Masternode "ClickIt"

With the Masternode (MN) "ClickIt" system, you can easily create all the masternodes you want in a few minutes by just clicking your mouse.

You can set up your own Masternode. If you do not have the funds to create a MN, then you can ask the community (network) to join your MN.

# Quaestor Coin Supply

---

Total Quaestor Coin supply will be 20,000,000 (Twenty Million)

Only 3% have been pre-mined i.e. 600,000 coins, and ALL are set up as Masternodes and LOCKED for 10 years.

200,000 coins are reserved for our development team.

400,000 coins were reserved for Affiliates who are building the Quaestor network (200 Masternodes).

19,400,000 coins are assigned for Masternode interest earnings.

The coding of the coin ensures that interest will be paid over a period of 3,850 days.

19,400,000 coins / 3,850 days means that each day 5,040 coins will be shared between active masternodes.

It requires 2,000 ( collateral ) coins to run each Masternode.

# Quaestor Exchange

---

Our own exchange, CryptoSook, opened December 2019, it is an intelligent exchange with features not offered anywhere else:

- Shared Masternodes
- Permanent discounts on trading fees when paying with QST coins
- 10% of your referrals trading fees paid directly to you

We understand that some people will not want to join the affiliate part of our business, however, they will still have a signup link for customers, meaning that every person they introduce as a customer to our exchange will give them access to the above.
